ABOUT ME

Full-stack web developer with hands-on experience building and deploying web applications, role-based platforms, real-time workflows, and interactive frontend experiences. Skilled in React, JavaScript, HTML, CSS, Firebase, Supabase, PostgreSQL, Git, GitHub, and Vercel. Combines software development fundamentals with rapid product development using modern development and no-code tools.

EDUCATION

Bachelor of Technology in Information Technology
Hindusthan College of Engineering and Technology, Coimbatore

Expected 2029
2025 – Present | Second Year

TECHNICAL SKILLS

- Programming: Python, JavaScript, HTML, CSS
- Frontend: React, Responsive Web Development, UI Development
- Backend and Database: Node.js (basics), Firebase, Supabase, PostgreSQL
- Deployment and Version Control: Vercel, Git, GitHub, CI/CD
- APIs and Development Tools: Google Maps Distance Matrix API, Figma, Lovable, Stitch, Bubble.io
- AI and Creative Tools: Canva, Kling AI, AI-assisted content and prompt design

PROJECTS

FixFlow — Service Booking and Job Tracking Platform

Completed Project | React, Supabase, PostgreSQL, Vercel, GitHub

- Engineered dual authentication for Customer and Technician roles with separate role-based workflows.
- Implemented real-time booking, job tracking, live notifications, payment integration, and automated invoice workflows.
- Configured Customer, Technician, and Admin dashboards with database-level Row Level Security policies.
- Deployed the application to Vercel and maintained source control and CI/CD workflows through GitHub.
- Delivered the core product in one day using Lovable, Stitch, Figma, Vercel, and GitHub for rapid development and deployment.

MediTwin AI — Smart Token and Appointment System

Completed Hackathon Project | React, Firebase, Google Maps Distance Matrix API

- Engineered a hospital queue-management application focused on appointment and token workflows.
- Implemented three role-specific portals for Patients, Doctors, and Admins with live dashboard functionality.
- Integrated Google Maps Distance Matrix API for location and distance-based functionality.
- Deployed the application and prepared a technical presentation for hackathon evaluation.

Interactive Marvel Character Website

Completed Project | HTML, CSS, JavaScript

- Created a multi-page interactive website featuring Stan Lee as the opening experience and nine Marvel characters.
- Implemented dedicated character pages and interactive navigation using HTML, CSS, and JavaScript.
- Developed a themed frontend experience combining structured content, visual design, and JavaScript interactions.

Personal Portfolio Website

Completed Project | Web Development

- Developed a responsive portfolio website to showcase technical skills, projects, certifications, and professional profile.
- Implemented a structured project presentation to make technical work accessible through a dedicated web portfolio.

Thanjavur Temple 3D Website

Currently in Development | 3D Web Experience

- Developing an interactive 3D web experience centered on the Thanjavur Temple.
- Implementing immersive 3D content and interactive web elements as part of an ongoing frontend development project.

NOTABLE ACHIEVEMENTS

- Completed four web development projects across healthcare, service management, portfolio development, and interactive frontend development.
- Delivered the core FixFlow product in one day, covering authentication, real-time workflows, dashboards, payment integration, invoicing, deployment, and version control.
- Completed MediTwin AI as an individual hackathon project with three role-specific portals: Patient, Doctor, and Admin.
- Created an interactive Marvel website with nine dedicated character experiences and a multi-page frontend interface.

CERTIFICATIONS

- Introduction to Web Design and Development — LinkedIn Learning.
- No Code Web App Development with Bubble.io.
- AI for Beginners — life-global.org.
- Introduction to Generative AI Studio — Google Cloud in collaboration with Simplilearn.
- Web Development — Certificate of Achievement.
